

FAQ

Q.The feeder is not connected, what is the problem, what to do.
A.

- 1:Check if the machine is normal: Check the status of the device indicator. After the power is turned on, the blue indicator light flashes. When the network is connected, it will be on. There will be a drop tone before the network is configured.
2. Check if the Wi-Fi username and password are normal: Wi-Fi username and password cannot have special characters. It is recommended to use English letters + number signs.
3. Uninstall the software and reinstall the software: Please authorize the APP to obtain the location information and access the network permissions during the installation process. Follow the above steps, and enter the correct wifi password. If you still have difficulties, please contact customer service.

Q. When connecting the feeder, sometimes it can be connected normally, sometimes not, how to deal with it.

1. Check if the machine's food outlet is blocked. At this time, the blue indicator is always on. Q. Why does the feeding time differ by tens of seconds from the current time?

A. The parameters set on the APP will have an error of about 30 seconds depending on the timing of the network environment.

Q. How to quickly reconnect after the machine is disconnected.

A 1 : Exit the APP and re-enter, wait for the data update

2:Switches from the feeding interface to the video interface and waits for the video to refresh.

Q. About SD card support capacity.

A.Support 8-64G

Q. Feeder requirements for network type

A.The feeder must use a wifi signal that satisfies the wifi 802.11bgn protocol.

Cleaning/maintenance

After the feeder has been used for a period of time, the bowl and the bucket should be cleaned with a cleaning agent to avoid the occurrence of bacteria that affect the health of the pet due to the long time left by the food residue.

1. The upper showed machine parts can be removed from the main feeder and cleaned with detergent and water.
2. The drying box in the upper cover is rotated counterclockwise to remove it.
3. The grain drum is dismantled by rotating the “grain barrel separation switch” .
4. The bowl is taken out by pulling down.
5. After cleaning, it must be dried or air-dried before being assembled into a whole main feeder for use.

▲ This feeder is suitable for dry foods smaller than 12 m m. Freeze-dried food is not available. Please keep the environment dry.

Operation Guide

1、The first use

- (1)Open the top cover of the feeder and remove the power cord adapter from the bucket.
- (2)Plug the power cord into the power connector on the rear of the main unit and connect the adapter to power.
- (3)Place the main unit in a horizontal position and the food bowl is installed at the corresponding position of the main unit.
- (4)Add pet dry food to the feeder bucket.
- (5)The desiccant is placed in the desiccant box by default. Please replace it regularly for long-term use (do not use cleaning)
- (6)The battery compartment can be installed with 3sections of No. 1 battery for manual feeding when there is no electricity (optional).
- (7)Bind the feeder to the Smart Life app to set up the feeding and planning of the pet.

2、The function description

Feed button: Short press to eat one, long press for 5 seconds to restore the factory settings.

Record button: Press and hold the “Record button” to record the sound to remind the pet to eat before feeding.

Play button: Plays the recorded sound.

Rocker switch: Feeder switch.

Dry battery compartment: Three 1st batteries can be installed for power supply.

5、WiFi Feeder APP Interface Introduction

Online Feeding Introduction

- ① More setting;set up other feeder function
- ② Automatic feeding: Choose automatic feeding
- ③ Feeding information: click to check feeding information
- ④ Manual feeding: manual feeding online
- ⑤ Adding timing: set up timing feeding rules

More setting

- ① Device Name: Edit Feeder Name
- ② Device Location: Set up the location of the device.
- ③ Check the device network: Check the device network status.
- ④ Share settings: Share the feeder to other users.
- ⑤ Create a group: Create a group to control multiple feeders.
- ⑥ Device Information: Check device Information
- ⑦ Feedback: feedback the question to the back-office service workers
- ⑧ Add to the main screen: Add the device to phone main screen.
- ⑨ Check the firmware upgrade: Check the device version information and upgrade functions online.

4、Video Feeder APP Interface Introduction

- Monitoring Screen Introduction**
- ①Setting: set other functions
 - ②Signal: Signal quality
 - ③Horn: Real-time monitoring
 - ④SD/HD: switch image quality
 - ⑤Full screen
- (1)Screenshot: take a picture from the video
(2)Talk: 2 way voice intercom
(3)Record: take record and save into the mobile phone
(4)Play: SD card video playback
(5)Alarm: motion detection alarm on/off (6)Feeding: click to feed
(7)Timed feeding: delivery food at regular intervals
(8)Cloud playback: Cloud storage video playback

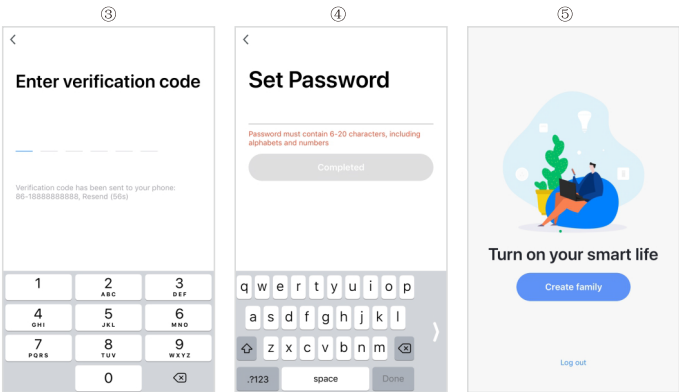

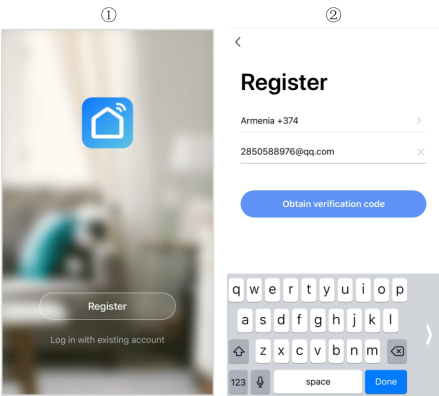

- Setting**
- ①Device name: edit pet feeder name
 - ②Share device: share the device with others
 - ③Device information: Query information
 - ④Basic function settings: Flip screen & Speech method
 - ⑤Motion detection: motion detection alarm switch
 - ⑥Memory card settings: Video mode and status of SD card
 - ⑦Feedback: Write feedback and send
 - ⑧Firmware information: firmware version & on-line upgrade
 - ⑨Remove device: remove device and unbind

7

3.2、Regis-tered APP

- ①Open the Smart Life APP.
- ②Click "Create a new account".
- ③ Select the time zone to enter the account and click to get the verification code.
- ④Enter the received verification code for verification.
- ⑤Set up login password and login successfully
